

Course Content: SAP ABAP HANA

- Row Store vs. Column Store
- ABAP Dictionary Enhancements
- Data Type Systems: ABAP & SAP HANA
- Database Schemas
- Code-to-data
- Code-to-data by means of
- OpenSQL& ABAP Dictionary views
- Advanced view definition
- ABAP Managed Database Procedures
- Native SQL
- SAP Development Tools for Eclipse
- ABAP Development Tools
- Code Continuity
- Mandatory Adaptions
- ABAP Test Cockpit
- Runtime Checks
- Performance Considerations & Guidelines
- Static Code Checks for Performance
- Optimization Potential
- Shortcomings of Static Code Checks
- SQL Monitor
- Analysis of SQL Monitor Data
- Combine Static Code Checks with SQL
- Monitor Runtime Data
- SQL Performance Tuning Worklist
- Performance Analysis
- Recommendations
- Transparent Optimizations

- ABAP List Viewer with Integrated
- Data Access
- Fault-Tolerant Search Help and Type-Ahead
- Enterprise Procurement Model
- Reminder: What is Open SQL?
- Open SQL evolution
- Open SQL enhancements Syntax
- SELECT list
- Open SQL enhancements
- SELECT list (cont.)
- GROUP BY and HAVING clauses
- JOIN statements
- Client handling
- Introduction to Core Data Services (CDS)
- Core Data Services in ABAP
- Consumption of CDS views
- CDS vs. Open SQL
- CDS View Definition Features
- Projection List
- Alias
- View-on-View Concept
- CDS View Extensions
- CDS Views with Input Parameters
- CDS Views: UNION and JOIN Support
- CDS Associations:
- Definition
- Consumption
- Association Types
- Ad-Hoc Association
- Exposed Association

- Filtered Associations
- Advantages of Associations
- Native SQL via ABAP Database Connectivity (ADBC)
- Consumption of SAP HANA Procedures
- Sneak Preview: ABAP Managed Database Procedure Consumption
- ABAP Managed Database Procedures Concept
- Definition
- Consumption
- Exception Handling
- Additional Information:
- Debugging AMDPs
- AMDP Extension Concept
- CDS Annotation Concept
- CDS Annotations
- SQL View Name
- Client Handling
- Buffering
- Currency & Quantity Columns
- CDS & SAP Gateway
- Recap
