

Course Content of SAN Management EMC (DELL):

- SAN Management
- Host SAN Concepts
- SAN Storage
- SAN Connectivity
- MDS-Series Switch Tools
- MDS Management Tools
- Licensing
- Management Tools Installation and Usage
- Switch Configuration
- Maintenance Tasks
- Management Security
- B-Series Switch Tools
- B-Series Management Tools
- Licensing
- Management Tools Installation
- Switch Configuration
- Maintenance Tasks
- Management Security
- SAN Management and Fabrication Virtualization
- Fabric Login Process
- Determine Device WWNs
- Zoning Overview
- Virtual Fabrics
- B-Series Switch Zoning
- MDS-Series Virtual SANS
- MDS-Series Switch Zoning
- VNX Storage Provisioning
- Symmetrix Storage Provisioning

- Fabric Configuration
 - Fibre Channel Fabric
 - B-Series Fabric Merge
 - MDS-Series Fabric Merge
 - Ineroperability Overview
 - FCIP Configuration
 - iSCSI Fabric Configuration
 - Port Virtualization
 - N_Port ID Virtualization
 - B-Series NPIV and Access Gateway Configuration
 - MDS-Series NPIV and NPV Configuration
 - vSphere NPIV Configuration
 - SAN Transformation
 - Cloud Concepts Overview
 - Converged Network Overview
 - FCoE Overview
 - Troubleshooting and Monitoring
 - Troubleshooting SAN
 - B-Series Troubleshooting and monitoring
 - MDS-Series Troubleshooting and monitoring
-
