

Contents of MSBI(SSIS)

1 About MSBI Training

1.1 Data warehousing & Business Intelligence

1.2 Introduction to Data warehousing & Business Intelligence SQL Server 2008R2 Business Intelligence

1.2.1 Course Agenda:

1.2.2 SQL Server 2008R2 Integration Services

1.2.3 Introduction to SQL Server Integration Services

1.2.4 Guided tour of Business Intelligence Development Studio

1.2.5 Introduction to Data Flow

1.2.6 Data Sources

1.2.7 Data Flow Transformations

1.2.8 Advanced Data Flow

1.2.9 Data Flow Destinations

1.2.10 Advanced Control Flow

1.2.11 Variables and Configurations

1.2.12 Debugging, Error Handling and Logging

1.2.13 Extending SSIS through Custom Code – Scripting

1.2.14 SSIS Package Deployment

1.2.15 SSIS Package Management

1.3 SQL Server 2008R2 Analysis Services

1.3.1 What Is Microsoft Business Intelligence?

1.3.2 Intermediate SSAS

1.3.3 Cube Storage and Aggregation

1.3.4 Beginning MDX

1.3.5 Intermediate MDX

1.3.6 SSAS Administration

- 1.3.7 Introduction to SSAS Clients
- 1.4 SQL Server 2008R2 Reporting Services
 - 1.4.1 SQL Server Reporting Services (SSRS) Architecture
 - 1.4.2 Authoring Reports
 - 1.4.3 Creating basic reports
 - 1.4.4 Leveraging expressions
 - 1.4.5 Grouping and sorting data
- 1.5 Implementing Parameters and Filters
 - 1.5.1 Building parameters into reports
 - 1.5.2 Restricting report data with filters
- 1.6 Leveraging Advanced Reporting Features
 - 1.6.1 Combining data regions in one report
 - 1.6.2 Presenting data with appropriate detail
- 1.7 Deploying and Delivering Reports
 - 1.7.1 Deploying reports to the server
- 1.8 Securing Reporting Services
 - 1.8.1 Securing the RS environment
 - 1.8.2 Creating reports with Report Builder
